MINI CLUBMAN (DATE 11/2023)

The BMW Group is committed to sustainable principles and is therefore taking proactive measures to avoid certain chemicals in the production of our vehicles. Due to that only substances that are technically required in the product are still contained. The substances are incorprorted in such a way that potential exposure to the customers is minimised, and danger for humans or the environment can be excluded as long as the vehicle and its parts are used as intended, and any repoirts, servicing and maintenance are carried out following technical instructions for those activities, and industry standard good practices. Safe use of the product is described in the owner manual that is consistent with our own commitment to promote the responsible manufacturing, handling and use of our products. Our information on repoir and servicing of vehicles and genuine parts also includes safe use information for service personnel. An end-of-life vehicle may only be disposed of legally in the European Union at an Authorised Treatment Focility (ATF). Vehicle parts should be disposed in accordance with locally applicable lows and local outwindry guidance.

Communication of information according to Article 33 REACH

Into product s composed or are use semined unear Article 313 and information accordance with a regulation of the duty to communicate information on substances in articles in accordance to Article 33. This product, including any article that the products composed of, does contain substances meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration below 0.1 1% well-that by well-this (Way). We inform that lead (IGAS-Nr. 74.93-92-11) is used in other order of the production of the products composed of, does contain substances meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration belonger to printing the other order in Article 57 and id

33. This product, including any article that the product is composed of, does contain substances meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w). We inform that lead (CAS-Nr. 7439-92-1) is used in almost all products categories, primary as alloying element. Recycled aluminum and metals may contain lead as impurity.	
Name of substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (Typical use according to the REACH Annex XV Dossier)	Location of article containing the substance in the product (Detailed, including optional equipment)
2-Ethoxyethyl acetate (typically for production of paints and polymers)	Interieur (Front seats) Drive Assistance (Radio-controlled locking system)
1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDME (typically as process solvent and for surface treatment)	Entertainment and Navigation (Anti-theft device)
1-Methyl-2-pyrrolidone, NMP (typically for production of electronic	Wheels and tires (Car wheels) Chassis (Steering column)
equipment and coatings) 6,6'-Di-tert-butyl-2,2'-methylenedi-p-cresol (typically for production of	Heating and air conditioning (Heater with control, seat heating)
polymers and rubbers)	Powertrain (Fuel tank with filler pipe) Electronic (Cable harness)
2-Methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one (typically used in coatings, paints and fillers)	Entertainment and Navigation (Radio, amplifier, CD-player) Heating and air conditioning (Heater with control, seat heating) Interieur (Front seats, Mirrors, sun visors, ashtrays, trays) Powertrain (Exhaust gas recirculation, Thermostat and engine mounted cooling lines)
2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)	Entertainment and Navigation (Central display and control unit) Powertrain (Exhaust pipe with catalyst or complete system, DPF)
4,4'-Isopropylidenediphenol (typically for production of polymers and	Electronic (Instrument cluster)
resins)  Diazene-1,2-dicarboxamide, ADCA (typically as blowing agent in plastic and rubber manufacturing)	Body (Bonnet latch, locks and fittings, Sealings) Entertainment and Navigation (Loudspeaker and cover) Interieur (Front door trim panel with ammests, Rear door trim panel with
