٦V	/EDTIBI	E	(DATE	11/2023)

MINI CON ble principles and is therefore taking pr The BMW Group is committed to sustainable principles and is therefore taking procetive measures to avoid certain chemicals in the production of our vehicles. Due to that only substances that are technically required in the product are sail contained. The substances are incorporated in such away that potential exposure to the customers is minimized, and dary repairs, servicing and malanteed as law gas the which and is participe are avoid as a certain chemicals in the production of our vehicles. Due to that only danger for humans or the environment can be excluded as law gas the which and is participe are avoid and and another that a consistent with our own commitment to promote the responsible moundarting, handling and use of our products. Safe use of the product is described in the owner manual that is consistent with our own commitment to promote the responsible moundarting, handling and use of our products. Our information on repair and servicing of vehicles and genuine parts also includes safe use information for service parts and levelike may only be disposed ellogish the European Union at Authorised Treatment Facility (ATF). Vehicle parts should be disposed and explain the European Union at Authorised Treatment Facility (ATF). Vehicle parts should be disposed and explain the European Union at Authorised Treatment Facility (ATF). Vehicle parts should be disposed and explain the European Union at Authorised Treatment Facility (ATF). Vehicle parts should be disposed and explain the European Union at authorised Treatment Facility (ATF). Vehicle parts should be disposed and explain the European Parliament and the Council concerning the Registration, Evolution, Authorisation and Restriction of Chemicals (REACH). Any supplier shall comply with the duy to communicate thiormation as ubstances in articles in accordance with Article 57 and identified in accordance with articles 57 and The BMW Group is committed to su isures to avoid certain als in the produ uction of our vehicles. Due to that or

Name of substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (Typical use according to the REACH Annex XV Dossier)	Location of article containing the substance in the product (Detailed, including optional equipment)				
1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDME (typically as process solvent and for surface treatment)	Drive Assistance (Radio-controlled locking system) Entertainment and Navigation (Anti-theft device) Wheels and tires (Car wheels)				
1-Methyl-2-pyrrolidone, NMP (typically for production of electronic equipment and coatings)	Chassis (Steering column)				
6,6'-Di-tert-butyl-2,2'-methylenedi-p-cresol (typically for production of	Heating and air conditioning (Heater with control, seat heating)				
polymers and rubbers) 2-Methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one (typically used in coatings, paints and fillers)	Powertrain (Fuel tank with filler pipe) Electonic (Brake lights, Cable harness) Entertainment and Navigation (Radio, amplifier, CD-player) Heating and air conditioning (Heater with control, seat heating) Interieur (Convertible top motor-operated, Mirrors, sun visors, ashtrays, trays) Powertrain (Thermostat and engine mounted cooling lines)				
2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)	Electronic (High voltage charging electronics)				
4,4'-Isopropylidenediphenol (typically for production of polymers and	Entertainment and Navigation (Central display and control unit) Electronic (Instrument cluster, Turn indicators front)				
resins) Diazene-1,2-dicarboxamide, ADCA (typically as blowing agent in plastic and rubber manufacturing)	Body (Colours, paints and basic material, Sealings) Entertainment and Navigation (Loudspeaker and cover) Interieur (Floor, trunk, engine compartment trim, mats, Front door trim panel with armrests, Partition wall tim panels, Side trim panel with armrests)				
Lead monoxide, lead oxide (typically as constituent of electronic components)	Body (Window mechanism with electrical control in front door) Chassis (Anti-block system, Brake boosters, Steering column) Communication (Off-hands mobile communication) Drive Assistance (Park assistent) Electronic (Contol units, moduls, Front lamp cluster, High voltage charging electronics, High-voltage accumulator system, High-voltage battery individual components, Inner lights, Instrument cluster, Switch, sensor, Turn indicators front) Entertainment and Navigation (Airbag-releasing device, Antenna, Video and tv-sets) Heating and air conditioning (Air conditioner, Auxiliary heater with control elements, Heater with control, seat heating) Interieur (Convertible top motor-operated, Mirrors, sun visors, ashtrays, trays) Powertrain (Carbon canister ventilation, Control Hybrides/E-drive, Double clutch transmission, Sensor for injection control unit, Thermostat and engine mounted cooling lines, Variable valve train, Ventilation, evaporation emission control)				
Silicic acid, lead salt (typically for production of glass and ceramics)	Electronic (Control units, moduls, Instrument cluster)				
Diboron trioxide (typically for production of borosilicate and crystal glass)	Heating and air conditioning (Heater with control, seat heating) Chassis (Anti-block system, Steering column) Communication (Off-hands mobile communication) Electronic (Front lamp cluster, High voltage charging electronics, High- voltage accumulator system) Entertainment and Navigation (Airbag-releasing device, Radio, amplifier, CD- player, Video and tv-sets) Heating and air conditioning (Heater with control, seat heating) Interieur (Mimors, sun visors, ashtrays, trays)				
Boric acid (typically for production of glass and ceramics and as flame	Powertrain (Manual transmission, Variable valve train) Heating and air conditioning (Heater with control, seat heating)				
retardant) Decamethylcyclopentasiloxane (typically as feedstock for the production	Chassis (Brake boosters)				
of silicone polymers)	Powertrain (Engine cooler with mounting)				
Dibutyl phthalate, DBP (typically as plasticizer for production of polymers)	Electronic (Switch, sensor)				
Dicyclohexyl phthalate (typically as plasticizer for production of polymers)	Heating and air conditioning (Auxiliary heater with control elements) Powertrain (Engine cooler with mounting)				
Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)	Chassis (Brake boosters)				
Imidazolidine-2-thione (typically for production of polymers and rubbers)	Chassis (Front axle suspension)				
N,N-Dimethylacetamide (typically as process solvent in polymer production)	Body (Windshield and rear window)				
production) Nonylphenol (typically as dispersing agent in coatings, adhesives and paints)	Heating and air conditioning (Air and water lines) Powertrain (Automatic transmission)				
Octamethylcyclotetrasiloxane (typically as feedstock for the production of silicone polymers)	Covertain (Automatic unismission) Chassis (Brake boosters) Communication (Off-hands mobile communication) Electronic (Switch, sensor) Powertrain (Control Hybrides/E-drive, Engine cooler with mounting, V- ribbed belt with tensioner and deflection)				
Benzene-1,2,4-tricarboxylic acid 1,2 anhydride (typically as plasticizer for production of polymers)	Interieur (Convertible top motor-operated)				
Tris(4-nonylphenyl, branched and linear) phosphite, TNPP (typically for production of polymers and rubbers)	Body (Badges, stickers, adhesive foils) Chassis (Rear wheel brakes)				
1,6,7,8,9,14,15,16,17,17,18,18-					
Dodecachloropentacyclo[12.2.1.16,9.02,13.05,10]octadeca-7,15-diene, "Dechlorane Plus"™ (typically as flame retardant)	Entertainment and Navigation (Radio, amplifier, CD-player) Body (Boot lid latch, locks and fittings)				
2,2',6,6'-tetrabromo-4,4'-isopropylidenediphenol (typically as flame retardant and as additive in plastics and resins)	Drive Assistance (Distance warning systems) Electronic (Brake lights, High-voltage accumulator system, High-voltage battery individual components, Instrument cluster) Interieur (Convertible top motor-operated) Powertrain (Control Hybrides):E-drive, Manual transmission)				
2-(2H-benzotriazol-2-yl)-4,6-ditertpentylphenol, UV-328 (typically for production of UV-absorbing polymers and coatings)	Electronic (Instrument cluster)				
Melamine (typically used in coatings, inks, resins and polymers)	Electronic (Cable harness, High voltage charging electronics)				
Medium-chain chlorinated paraffins (typically as flame retardant and as	Interieur (Front door trim panel with armrests, Front seats) Interieur (Convertible top motor-operated)				
additive in plastics, sealants, rubber, textiles) Diphenyl(2,4,6-trimethylbenzoyl)phosphine oxide (typically as additive in	Powertrain (Coolants lines)				
plastic applications, for adhesives, sealants, coatings and inks) 2-benzyl-2-dimethylamino-4'-morpholinobutyrophenone (typically for	Powertrain (Electric machine)				
2-benzyl-2-binethylamino-4-morpholinobutyrophenone (typically for adhesives, sealants, coatings and inks) Lead titanium zirconium oxide (typically as constituent of electronic	Powertrain (Thermostat and engine mounted cooling lines)				
components)	Entertainment and Navigation (Airbag-releasing device)				
2-Ethylhexyl 10-ethyl-4,4-dioctyl-7-oxo-8-oxa-3,5-dithia-4- stannatetradecanoate, DOTE (typically for production of paints and	Body (Loose car body components) Electronic (Control units, moduls)				
polymers) Bis(2-(2-methoxyethoxy)ethyl)ether, tetraglyme (typically as process	Wheels and tires (Car wheels) Electronic (Instrument cluster)				
solvent) S-(Tricyclo(5.2.1.0'2,6)deca-3-en-8(or 9)-yl O-(isopropyl or isobutyl or 2- ethylhexyl) O-(isopropyl or isobutyl or 2-ethylhexyl) phosphorodithioate	Powertrain (Vacuum pump)				
(typically used in lubricants) The information provided in this document related to material and substance content rep information provided by suppliers to us.	resents our knowledge and belief, which may be based in whole or in part on available				
information provided by suppliers to us. Additional Information: Certain inorganic axides are bound in glass or ceramic matrices that change their individual substance properties as well as their communication duties un REACH. Similar changes accur with certain precursors that are bound in polymers.
