

MINI Cooper Convertible (DATE 02/2025)	
<p>The BMW Group is committed to sustainable principles and is therefore taking proactive measures to avoid certain chemicals in the production of our vehicles. Due to that only substances that are technically required in the product are still contained. The substances are incorporated in such a way that potential exposure to the customers is minimised, and danger for humans or the environment can be excluded as long as the vehicle and its parts are used as intended, and any repair, servicing and maintenance are carried out following technical instructions for those activities, and industry standard good practices. Safe use of the product is described in the owner manual that is consistent with our own commitment to promote the responsible manufacturing, handling and use of our products. Our information on repair and servicing of vehicles and genuine parts also includes safe use information for service personnel. An end-of-life vehicle may only be disposed of legally in the European Union at an Authorised Treatment Facility (ATF). Vehicle parts should be disposed in accordance with locally applicable laws and local authority guidance.</p>	
<p>Communication of information according to Article 33 REACH</p> <p>This product is composed of articles defined under Article 3(3) of the Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH). Any supplier shall comply with the duty to communicate information on substances in articles in accordance to Article 33. This product, including any article that the product is composed of, does contain substances meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w). We inform that lead (CAS-Nr. 7439-92-1) is used in almost all products categories, primary as alloying element. Recycled aluminium and metals may contain lead as impurity.</p>	
Name of substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (Typical use according to the REACH Annex XV Dossier)	Location of article containing the substance in the product (Detailed, including optional equipment)
1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDME (typically as process solvent and for surface treatment)	Wheels and tires (Car wheels) Entertainment and Navigation (Anti-theft device)
6,6'-Di-tert-butyl-2,2'-methylene-di-p-cresol (typically for production of polymers and rubbers)	Powertrain (Fuel lines, Ventilation, evaporation emission control) Chassis (Front axle suspension) Interior (Mirrors, sun visors, ashtrays, trays) Body (Window mechanism with electrical control in front door) Interior (Convertible top motor-operated) Entertainment and Navigation (Anti-theft device) Drive Assistance (Distance warning systems) Body (Safety belts)
2-Methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one (typically used in coatings, paints and fillers)	Body (External fittings) Interior (Mirrors, sun visors, ashtrays, trays, Convertible top motor-operated) Electronic (Cable harness, Brake lights)
2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)	Chassis (Output shafts) Interior (Convertible top motor-operated)
4,4'-Isopropylidenediphenol (typically for production of polymers and resins)	Electronic (Control units, moduls)
Bis(α,α-dimethylbenzyl) peroxide (typically used for production of polymers and as a processing aid and cross-linker in polymers)	Powertrain (Vibration damper, Thermostat and engine mounted cooling lines) Chassis (Front wheel brakes) Wheels and tires (Car wheels) Electronic (Windshield wipers, Inner lights) Heating and air conditioning (Heater with control, seat heating, Air conditioner) Powertrain/Chassis (Board equipment)
Diazene-1,2-dicarboxamide, ADCA (typically as blowing agent in plastic and rubber manufacturing)	Chassis (Rear axle suspension) Interior (Front door trim panel with armrests, Side trim panel with armrests, Floor, trunk, engine compartment trim, mats) Entertainment and Navigation (Loudspeaker and cover)
Diboron trioxide (typically for production of borosilicate and crystal glass)	Interior (Mirrors, sun visors, ashtrays, trays, Convertible top motor-operated) Electronic (Front lamp cluster, Rear light cluster) Entertainment and Navigation (Video and tv-sets, Anti-theft device, Airbag-releasing device)
Boric acid (typically for production of glass and ceramics and as flame retardant)	Interior (Reinforcement body) Electronic (Windshield-washer unit)
Decamethylcyclotrisiloxane (typically as feedstock for the production of silicone polymers)	Powertrain (Injection nozzles and tubing) Body (External fittings) Interior (Mirrors, sun visors, ashtrays, trays) Electronic (Control units, moduls) Heating and air conditioning (Air conditioner)
Dicyclohexyl phthalate (typically as plasticizer for production of polymers)	Chassis (Steering column)
Dodecamethylcyclotrisiloxane (typically as feedstock for the production of silicone polymers)	Powertrain (Injection nozzles and tubing, Sensor for injection control unit, Carbon canister ventilation) Electronic (Control units, moduls) Heating and air conditioning (Air conditioner)
Imidazolidine-2-thione (typically for production of polymers and rubbers)	Powertrain (Carbon canister ventilation) Communication (Off-hands mobile communication)
N,N-Dimethylacetamide (typically as process solvent in polymer production)	Entertainment and Navigation (Loudspeaker and cover)
Octamethylcyclotrisiloxane (typically as feedstock for the production of silicone polymers)	Powertrain (Injection nozzles and tubing) Body (External fittings) Interior (Mirrors, sun visors, ashtrays, trays)
Benzene-1,2,4-tricarboxylic acid 1,2 anhydride (typically as plasticizer for production of polymers)	Interior (Convertible top motor-operated) Entertainment and Navigation (Loudspeaker and cover)
Triphenyl phosphite (TPP); (typically used for adhesives and sealants, coating products)	Powertrain (Engine cooler with mounting) Chassis (Anti-block system electrical components) Interior (Mirrors, sun visors, ashtrays, trays) Electronic (Cable harness) Entertainment and Navigation (Video and tv-sets)
Tris(4-nonylphenyl, branched and linear) phosphite, TNPP (typically for production of polymers and rubbers)	Chassis (Rear wheel brakes)
2,2',6,6'-tetrabromo-4,4'-isopropylidenediphenol (typically as flame retardant and as additive in plastics and resins)	Powertrain (Thermostat and engine mounted cooling lines, Double clutch transmission) Interior (Mirrors, sun visors, ashtrays, trays) Body (Boot lid latch, locks and fittings) Interior (Convertible top motor-operated) Electronic (Control units, moduls, Brake lights) Entertainment and Navigation (Airbag-releasing device) Drive Assistance (Heading control, Interior camera)
Cobalt(II) sulphate (typically for surface treatment)	Body (Safety belts)
Melamine (typically used in coatings, inks, resins and polymers)	Powertrain (Fuel tank with filler pipe) Body (Loose car body components) Interior (Front seats) Electronic (Cable harness, Switch, sensor) Entertainment and Navigation (Video and tv-sets)
Bumetizole (typically as plasticizer for production of polymers and paints)	Powertrain (Housing cover) Chassis (Steering column) Body (External fittings) Interior (Mirrors, sun visors, ashtrays, trays, Floor, trunk, engine compartment trim, mats) Body (Sealings) Interior (Convertible top motor-operated) Electronic (Windshield-washer unit)
1,3,5-Tris(oxiran-2-ylmethyl)-1,3,5-triazinane-2,4,6-trione, TGIC (typically for production of resins and coatings)	Electronic (Front lamp cluster)
Bis(4-chlorophenyl)sulfone (typically for production of polymers and rubbers)	Powertrain (Fuel tank with filler pipe)
Diphenyl(2,4,6-trimethylbenzoyl)phosphine oxide (typically as additive in plastic applications, for adhesives, sealants, coatings and inks)	Body (External fittings)
Cobalt(II) nitrate hexahydrate (typically as additive in magnets for electronic assemblies)	Electronic (Head-up Display)
2-(2H-benzotriazol-2-yl)-4-(1,1,3,3-tetramethylbutyl)phenol (typically as dispersing agent in coatings, adhesives, sealants, printing inks, fillers)	Chassis (Steering column) Body (External fittings) Interior (Mirrors, sun visors, ashtrays, trays, Instrument panel) Body (Air guides) Electronic (Switch, sensor, Inner lights) Drive Assistance (Interior camera) Communication (Off-hands mobile communication)
2-benzyl-2-dimethylamino-4'-morpholinobutyrophenone (typically for adhesives, sealants, coatings and inks)	Electronic (Control units, moduls)
<p>The information provided in this document related to material and substance content represents our knowledge and belief, which may be based in whole or in part on available information provided by suppliers to us.</p> <p>Additional Information: Certain inorganic oxides are bound in glass or ceramic matrices that change their individual substance properties as well as their communication duties under REACH. Similar changes occur with certain precursors that are bound in polymers.</p>
